

Great News!

In addition to bulk, CELLCOAT® Flasks and Multiwell Dishes are now also available in Small Packaging sizes!

The Greiner Bio-One **CELLCOAT®** product line comprises cell culture vessels which are coated with proteins of the extracellular matrix (Collagen Type I, Fibronectin, Laminin) or synthetic proteins (Poly-D- and Poly-L-Lysine).

Beside an improved adhesion and proliferation of primary cells and various cell lines, **CELLCOAT®** plates are highly suitable for serum-free and serum-reduced cell cultivation and additional washing steps or stressful procedures, e.g. transfection.
