

**FAST.**

**SAFE. EFFICIENT.**

## EDI - E-COMMERCE SOLUTIONS from Greiner Bio-One

EDI (Electronic Data Interchange) replaces manual order processing with electronic, standardised processes and enables an error-free and fast exchange between your company and Greiner Bio-One.

This means that EDI is the optimal solution wherever data, from medium to high volume, is regularly exchanged on the basis of long-term business relationships. Purchase requisitions generated by your ERP system are converted into a purchase order and transmitted to the ERP system at Greiner Bio-One in a standardised format. It is possible to transfer other file formats such as delivery notes or invoices.

### ADVANTAGES EDI:

- / Reduction of repetitive input and data entry errors
- / Fast and reliable information flow
- / Optimisation of business processes
- / Cost savings in data handling due to lower transmission costs

### CONTACT OUR SPECIALISTS

We are also happy to advise you on the implementation of electronic catalogues.

We will find the right solution for you in all common formats (xls, BMEcat, csv ...).
