

CELLSTAGE

New CELLdisc filling accessory

CELLstage is an accessory for the optimum positioning of CELLdisc during the filling process (30° and 20° to the horizontal plane for CD4-CD24 and CD40, respectively).

- Stainless steel allows for autoclave sterilization
- / Suitable for left- and right-handed users
- / Available for CELLdisc with 4-24 and 40 layers

CELLEVATOR

Easy and secured CELLdisc stacking

The CELLevator is a CELLdisc accessory facilitating easy and secured stacking of two CELLdisc devices to enable best possible utilization of a given space (e.g. in an incubator).

- Easy assembly of the three polypropylene segments
- Maximum loading capacity: 8 Kg
- Autoclavable (120 °C, 2 bar) 1

Autoclaving the CELLevator more than 3 times is not recommended. After each autoclaving cycle the integrity of the segments has to be analyzed by the user.

CELLRINGLevelling ring

CELLring assures an exact horizontal position of CELLdisc compensating surface irregularities, e.g. of a working bench or an incubator. Thus, cells and medium distribute evenly in every single layer of your CELLdisc.

- / Ensures planar positioning of CELLdisc
- / Consistent distribution of cells and media in every layer

CELLHANDLE

Transportation gripper

CELLhandle facilitates secure and easy transportation of particularly largesized CELLdisc formats as well as convenient emptying of these.

- / Gripping device for large-sized CELLdisc
- / Easy lifting, emptying and transporting
- / Enables single-hand usage

CELLdisc Accessories

Item No.	Description	Quantity per bag	Quantity per case
878072	CELLstage (for CELLdisc with 4-24 layers)	1	1
878073	CELLstage (for CELLdisc with 40 layers)	1	1
878071	CELLevator - Stacking device for CELLdisc	1	9
