WE TAKE CARE OF YOUR SAFETY

VACUETTE®

Safety products

Greiner Bio-One has a wide range of safety products for various circumstances.

greiner
BIO-ONE

The consequences of a needlestick injury can have far-reaching implications both professionally and personally for the person affected and their family.

One of the most effective
ways to protect yourself
is to use safety products.

NEEDLESTICK INJURIES ARE HISTORY

A large number of exposures to bloodborne pathogens in the healthcare sector can be attributed to sharps-related injuries. Safety standards to protect healthcare workers as well as advances in technology have helped to reduce occurrences but have not eliminated the risk.

More than 50% of all reported sharps injuries involve nursing staff and physicians and occur in surgical settings, patient rooms

and emergency departments.* Needlesticks involving phlebotomy personnel, though in lesser numbers, are still an issue.

However, this does not mean that needlestick injuries represent an unavoidable occupational risk. The correct use of VACUETTE® safety products can minimize or potentially eliminate this risk.

WE TAKE CARE OF YOUR SAFETY BY PROVIDING:

- / A wide range of safety products.
- / Product options for specific applications.
- / The right safety product for every situation.

*International Safety Center. U.S. EPINet Sharps Injury and Blood and Body Fluid Exposure Surveillance Research Group. Sharps Injury Data Report for 2019; 36 hospitals contributing data, 1335 total records. Report available at <https://internationalsafetycenter.org/wp-content/uploads/2020/06/2019-EPINet-Needlestick-Sharps-Summary.pdf>.

THE RIGHT SAFETY PRODUCT FOR EVERY SITUATION

We offer an extensive range of safety products, allowing the most suitable device to be selected for every customer and every patient. At Greiner Bio-One, you will find the optimal safety device for your individual needs as well as safety design options: from user-controlled

shielding devices to those with semi-automatic retraction.

Our products enable you to optimally protect yourself against needlestick injuries in a manner to suit your environment.

Standard venipuncture.

Our VACUETTE® QUICKSHIELD products are suitable for routine, daily blood collection.

VACUETTE® QUICKSHIELD Complete PLUS, QUICKSHIELD with Multiple Use Drawing Needle or QUICKSHIELD with VISIO PLUS Needle

Challenging vein conditions.

All of our safety blood collection sets are designed for patients who present more challenging vein conditions, such as geriatric or pediatric patients. The VACUETTE® EVOPROTECT ensures a gentle blood collection experience with the added benefit of semi-automatic retraction.

VACUETTE® EVOPROTECT or SAFETY Blood Collection Set

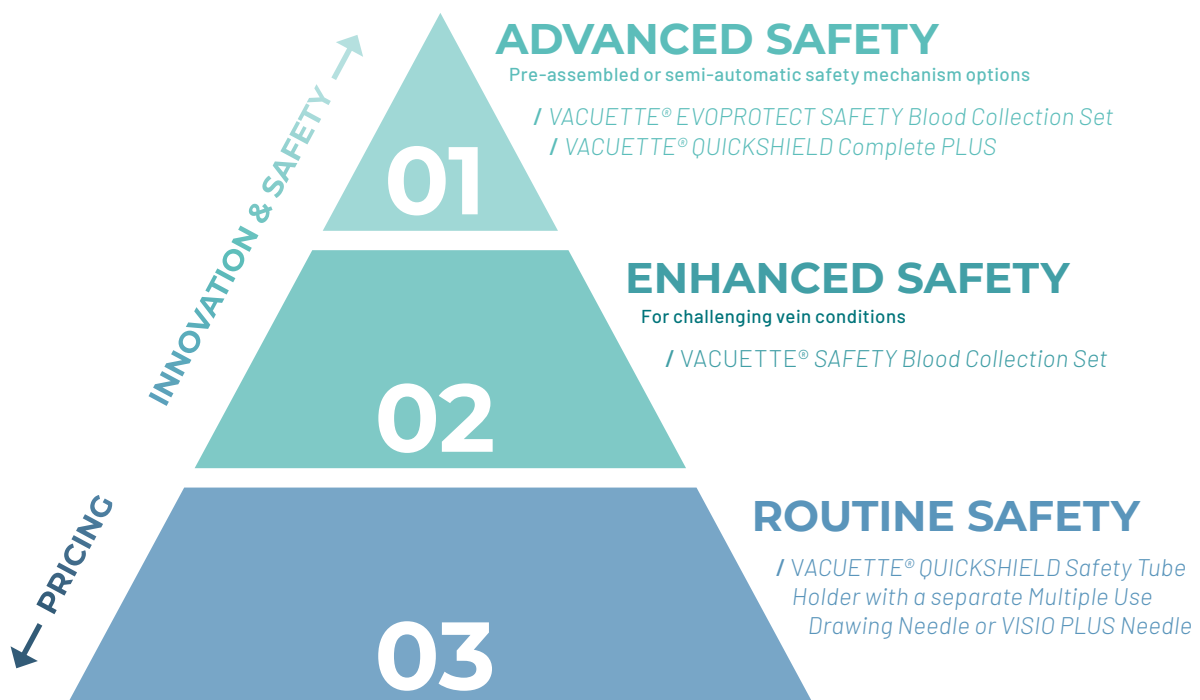

Blood cultures.

For the collection of blood cultures and routine samples, the safety blood collection set with pre-assembled blood culture holder provides a convenient solution.

VACUETTE® SAFETY Blood Collection Set with Blood Culture Holder

GREINER BIO-ONE PRODUCT OPTIONS

You will find the right solution for every situation in our portfolio of safety products. From those with a manual safety mechanism to semi-automated safety, we have the right solution for your individual needs.

FIND THE RIGHT SAFETY PRODUCT QUICKLY AND EASILY

In the following overview, you can see at a glance the features that each product offers and the type of safety it provides. This facilitates making the best possible choice for your needs.

		Safety device	Semi-automatic needle retraction	In-vein activation	One-handed activation	Pre-assembled product	Flash indicating successful venipuncture	Shield can be re-positioned	Blood collection & infusion with the same set	Extra thin-walled needle* (increased flow rate)	Virtually no tubing memory	Not made with natural rubber latex	DEHP free

Needlestick injuries can be
prevented with implementation
of safety products.

A protective shield
keeps the needle secured
after activation, protecting the user
from risk of needlestick.

**FOR DAILY, ROUTINE
BLOOD COLLECTION**

VACUETTE® QUICKSHIELD
Safety Tube Holder

The ergonomic design of the holder ensures a good grip during venipuncture.

NO CHANGE TO COLLECTION TECHNIQUE

The VACUETTE® QUICKSHIELD Safety Tube Holder by Greiner Bio-One can be used with either VACUETTE® Multiple Use Drawing Needle or VACUETTE® VISIO PLUS Needle. With VACUETTE® QUICKSHIELD Complete PLUS, a VISIO PLUS Needle is pre-assembled with the QUICKSHIELD Safety Tube Holder.

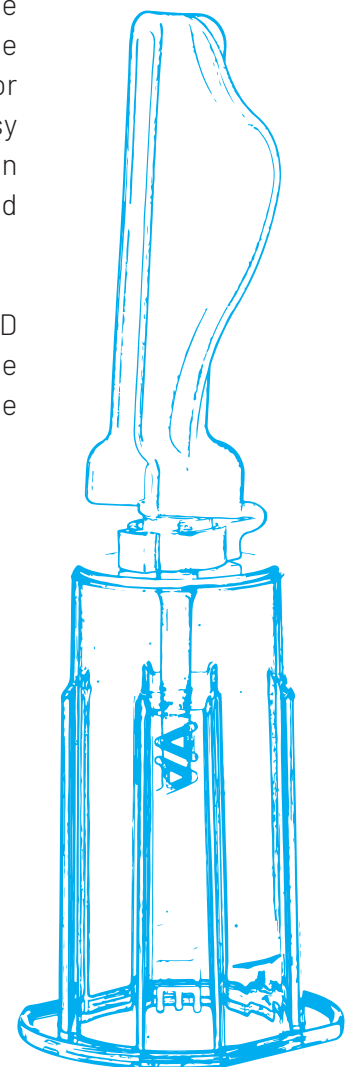

The protective shield is attached directly to the holder. With the

one-handed activation of the protective shield using a stable surface, the index finger or thumb, this product provides easy handling as well as protection from needlestick injury and biohazardous exposure.

The VACUETTE® QUICKSHIELD Safety Tube Holder protects the user without the need to change collection technique.

PROTECTIVE SHIELD FOR ADDED SAFETY.

- / No change to collection technique.
- / Rotational safety shield provides more flexibility to adapt to patient-specific circumstances.
- / Audible and tactile click indicating proper activation of the safety shield.

**EASILY
SAVE TIME**

ACTIVATING THE SAFETY MECHANISM

Option 1

Option 2

1

Activate the safety mechanism using **a stable surface, index finger or thumb.**

2

Proper activation is indicated by an audible and tactile **click.**

IMPROVED SAFETY

Once the shield is in place, the needle is securely and irreversibly enclosed.

The VACUETTE® SAFETY Blood Collection Set provides a gentle experience for the patient.

ENHANCED SAFETY FOR CHALLENGING SITUATIONS

VACUETTE® SAFETY
Blood Collection Set

Ergonomic packaging
is easy to open and
minimizes waste.

AN ENHANCED LEVEL OF SAFETY

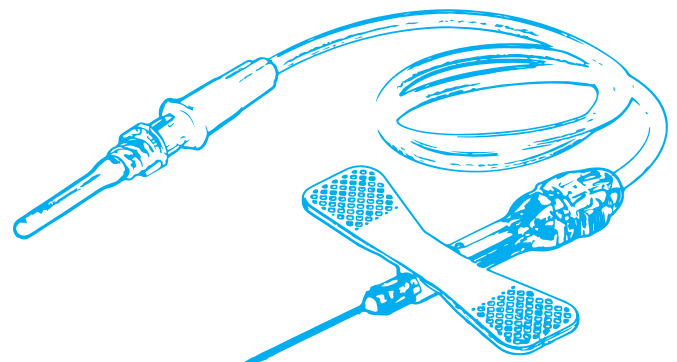

This product provides a high degree of safety with activation while the cannula is still in the vein. Proper activation by the user is associated with a clearly audible click. The SAFETY Blood Collection Set thereby provides enhanced protection against needlestick injuries. Visual confirmation of successful venipuncture is facilitated with a transparent view area, which also allows for visual

control throughout collection. The set can be used for venous blood collection or infusions for up to five hours.*

The SAFETY Blood Collection Set is a sterile, single-use winged needle, connected to flexible tubing, with or without a luer adapter, or pre-assembled with standard or blood culture holder.

INTUITIVE PRODUCT DESIGN.

- / A view area in the body of the device provides visual indication of successful venipuncture.
- / Tubing of different lengths offers more flexibility in blood collection.
- / The safety mechanism provides simple, in-vein activation.

* Except SAFETY Blood Collection Set with the blood culture holder

VERSATILE USE

for blood collection
or infusion*
(up to 5 hours)

FOUR PRODUCT VARIATIONS

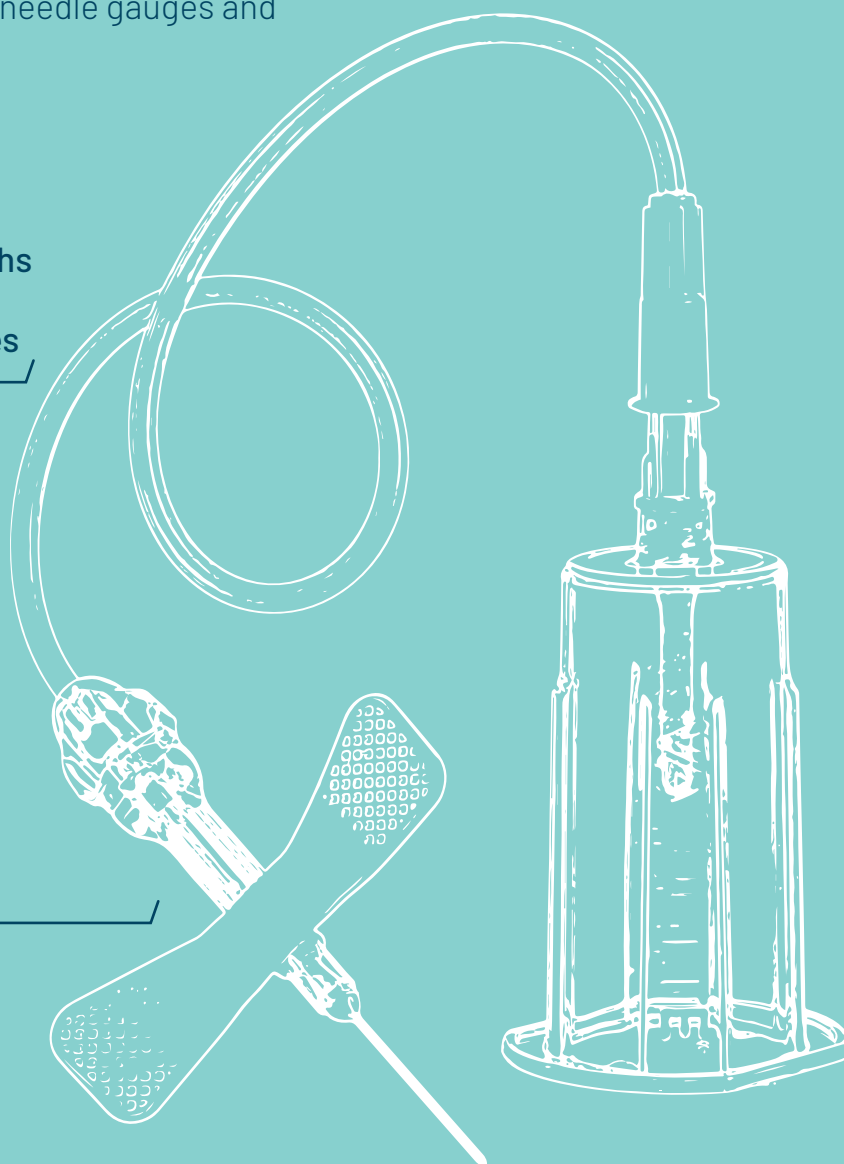

SAFETY BLOOD COLLECTION SET

The VACUETTE® Safety Blood Collection Set is available as an infusion set or pre-assembled with a luer adapter, standard holder or blood culture holder with various needle gauges and tubing lengths.

Pre-assembled products
are available in sterile
blister packaging

Tubing with different lengths
offers more flexibility in
blood collection procedures

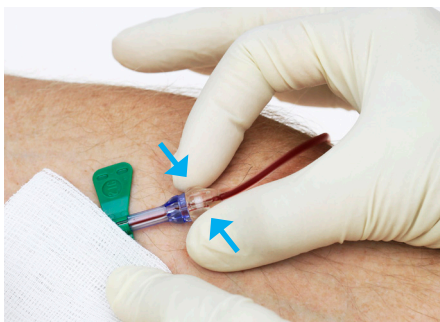

A view area in the body
of the device provides
visual confirmation of
successful venipuncture

EASY ACTIVATION OF THE SAFETY MECHANISM

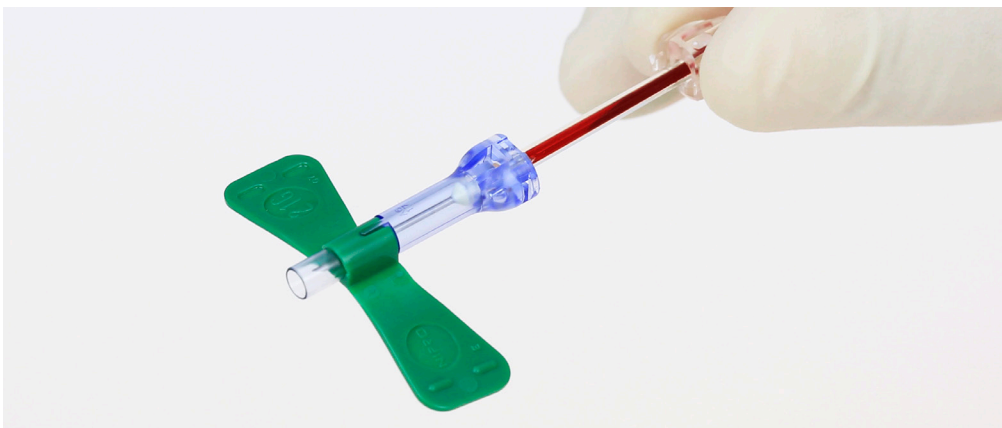

1

Activate the safety mechanism by **pressing on both sides of the clear hub**.

2

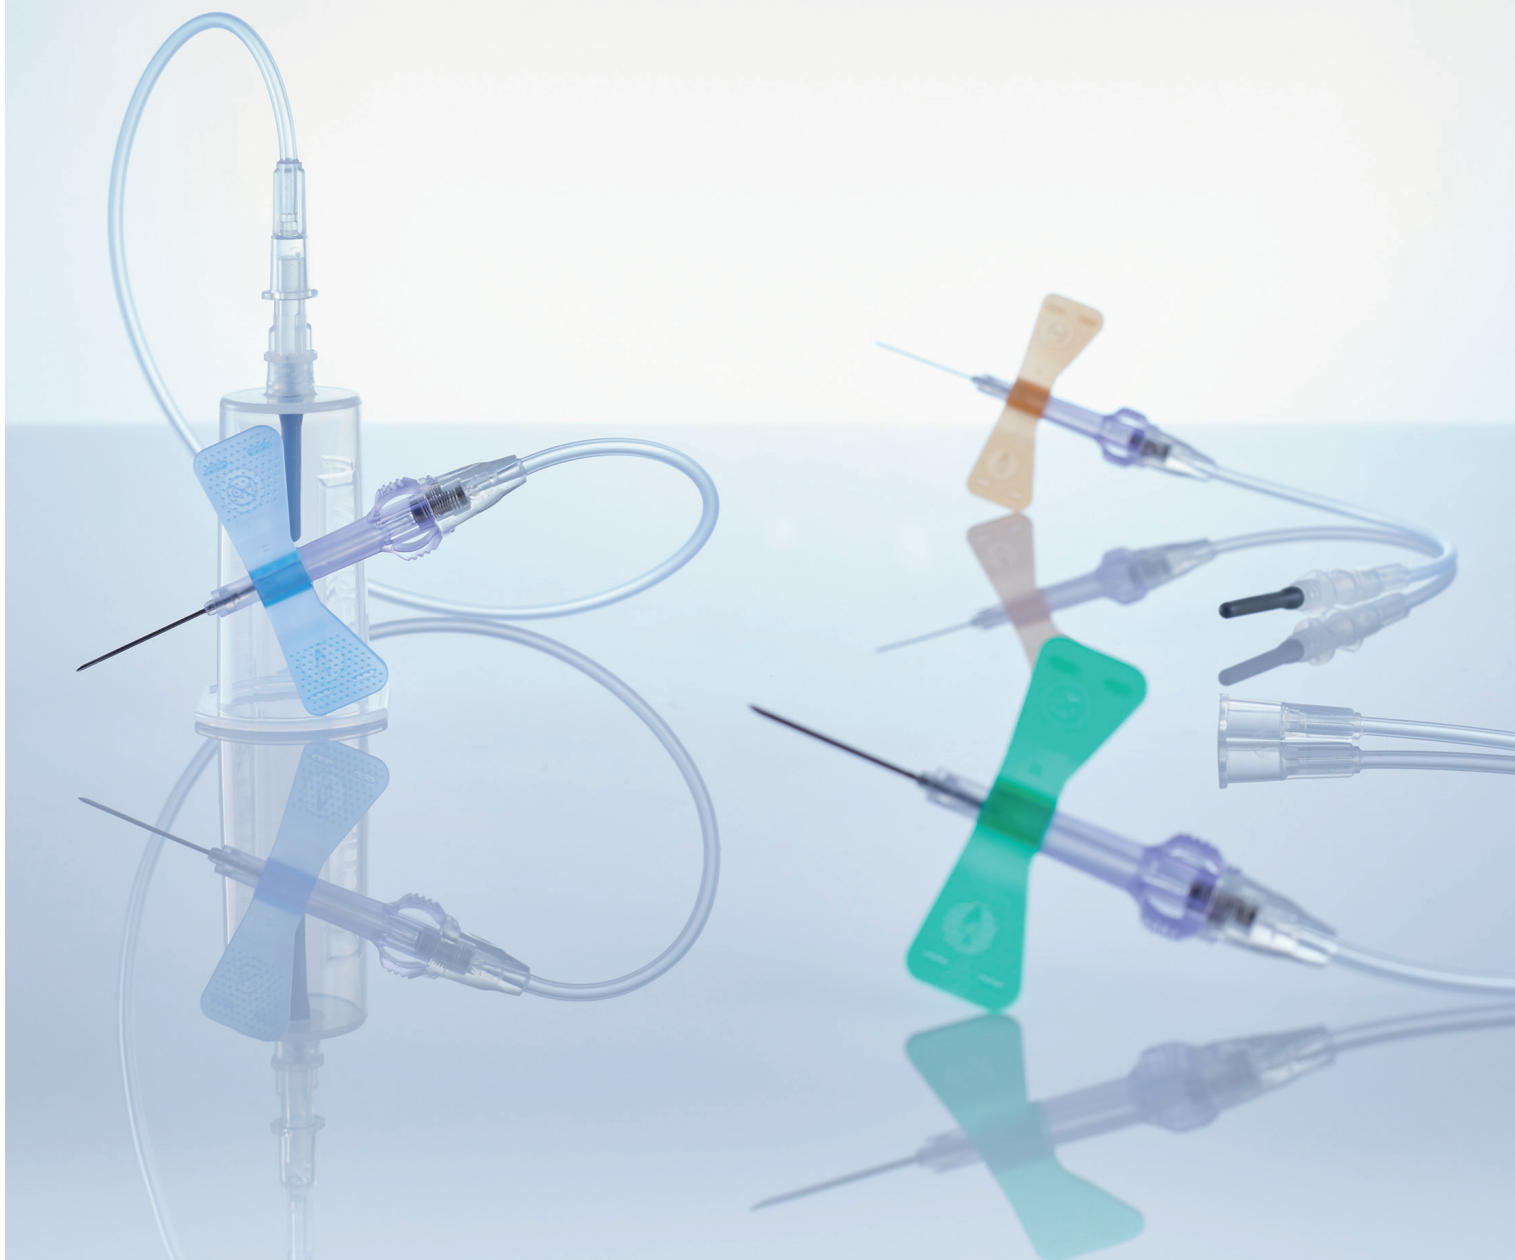

Pull back. Correct activation is indicated by an audible and tactile **click**.

IMPROVED SAFETY

Following activation, the needle is securely and irreversibly enclosed for maximum safety.

The next evolution of safety
in blood collection.

THE GENTLE TOUCH

VACUETTE® EVOPROTECT
SAFETY Blood Collection Set

May be used for
blood collection
and subsequent
short-term infusion
for up to 4 hours.

THE NEXT EVOLUTION OF SAFETY

The semi-automatic, spring mechanism minimizes risk of needlestick injury and makes your daily work safer because we believe that every needlestick injury is one too many.

The VACUETTE® EVOPROTECT SAFETY Blood Collection Set is designed for patient comfort and intuitive use. It consists of a winged needle with a spring-activated safety mechanism when the release buttons are

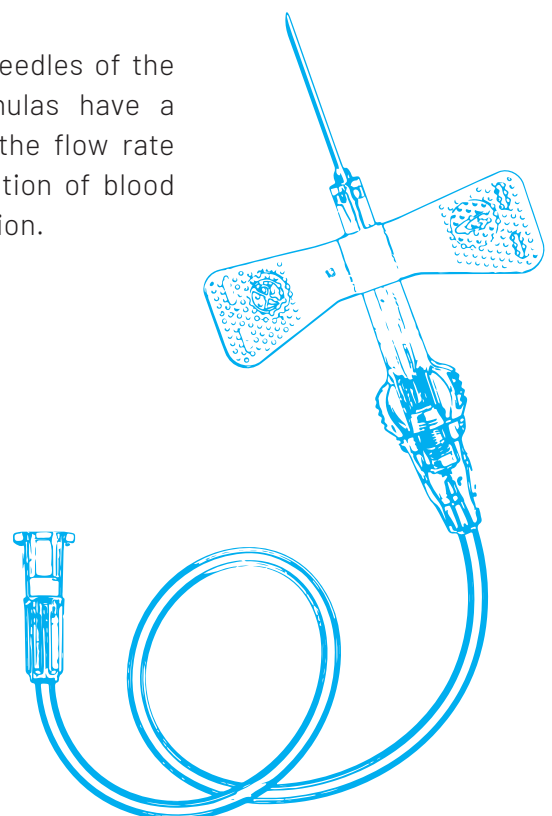

pressed.

The EVOPROTECT is meant for one-handed activation while the needle is still in the vein, which virtually eliminates the risk of needlestick injuries.

Extra thin-walled needles of the 21G and 23G cannulas have a positive effect on the flow rate as well as the duration of blood collection and infusion.

SEMI-AUTOMATIC SAFETY MECHANISM.

- / An audible click confirms successful activation.
- / Activation ensures the needle is safely and irreversibly secured within the body of the device.

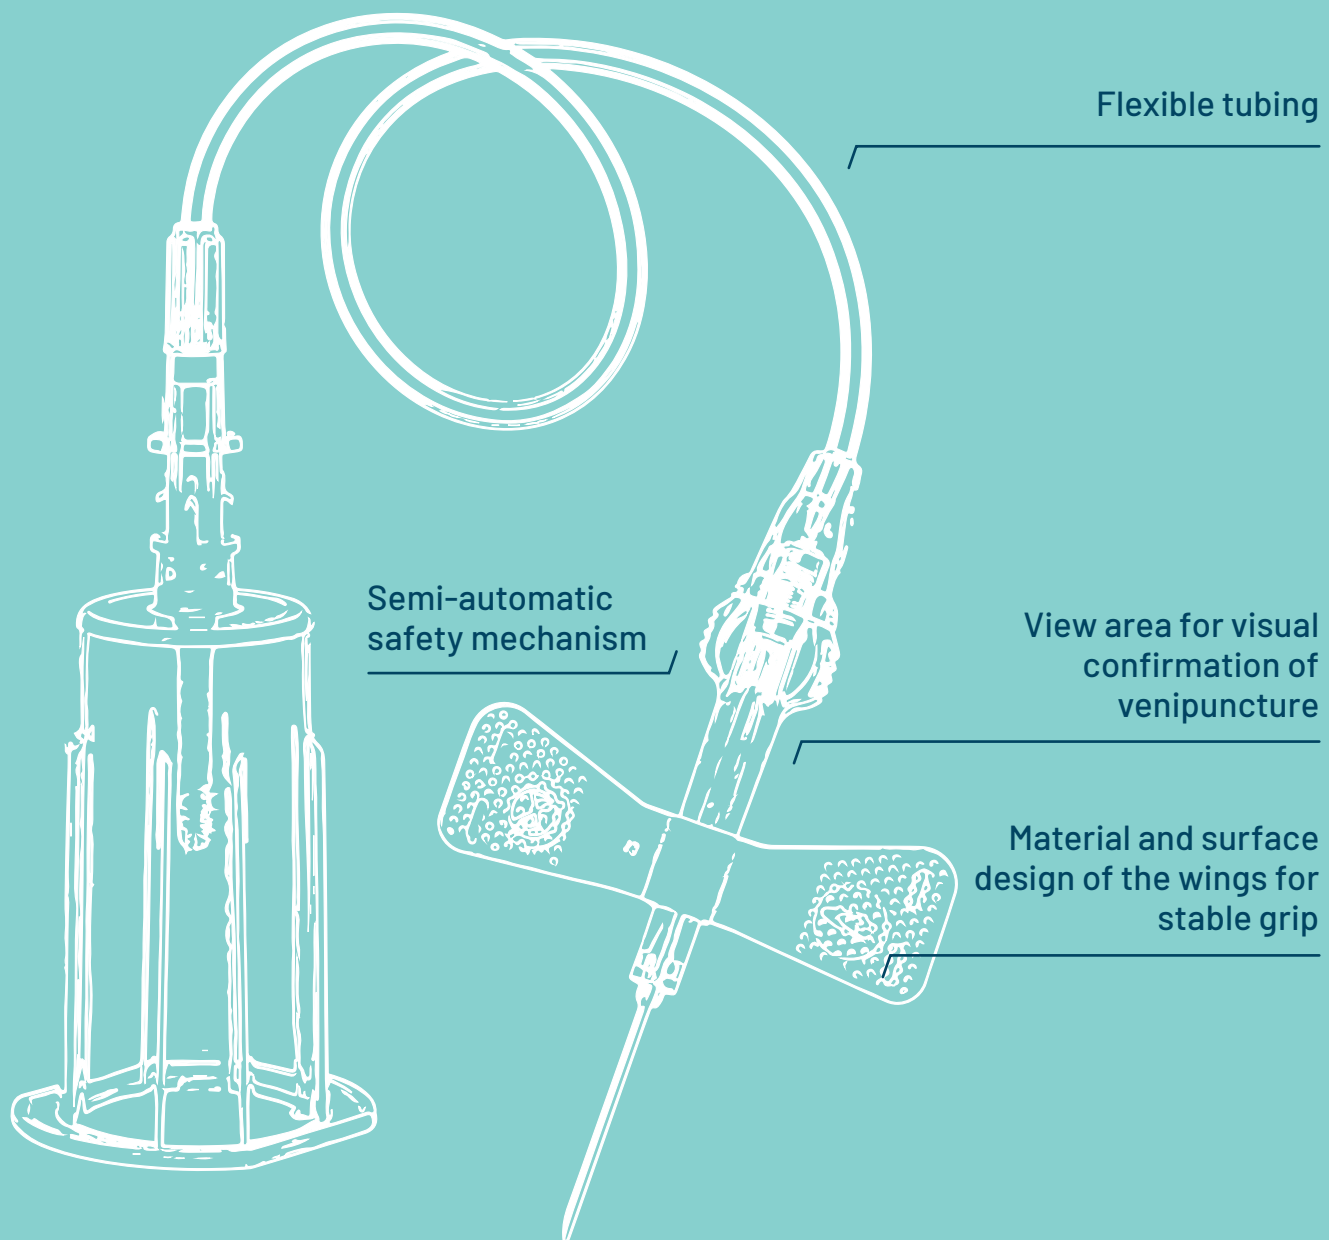

EASE OF USE

with optimal design
for intuitive handling

THE NEXT EVOLUTION OF SAFETY

VACUETTE® EVOPROTECT SAFETY BLOOD COLLECTION SET

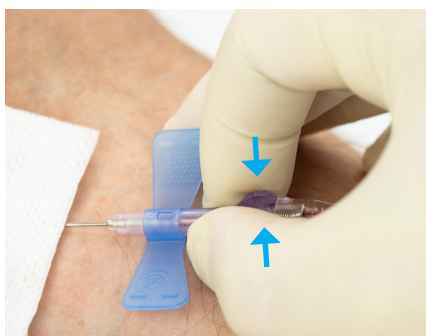

The trigger of the patented, semi-automatic safety mechanism is located on the side of the device, facilitating one-handed activation while keeping patient comfort in mind.

PLEASE
OBSERVE THE
INSTRUCTIONS
FOR USE

available at
www.gbo.com

MAXIMUM SAFETY IN USE

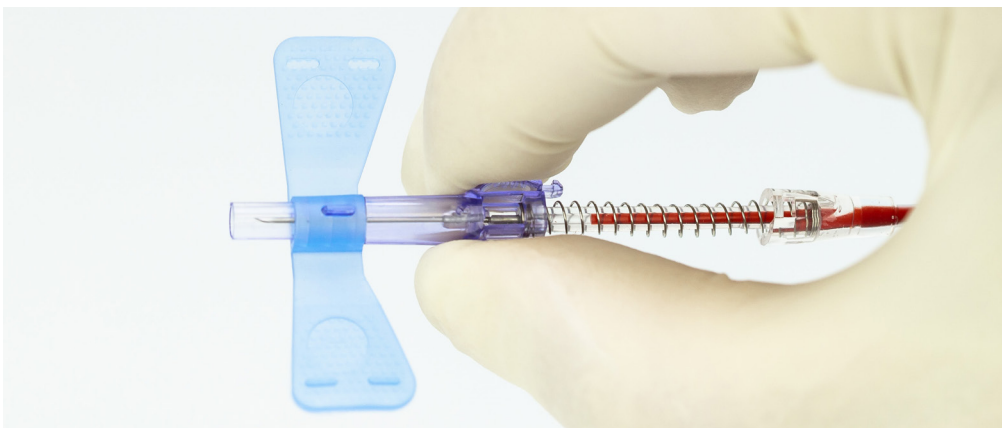

1

Activate the safety mechanism with one hand by **pressing the blue release buttons**. Take care not to hinder the automatic retraction.

2

After the needle has retracted automatically, you will hear a **click**. This indicates correct and successful activation of the safety mechanism.

THE SPRING MECHANISM

allows semi-automatic activation from the patient's vein to minimize risk.

SERVICES

SAFETY FOR EVERY LEVEL

You will find the right product for every circumstance, from those for routine procedures to advanced safety products with semi-automatic safety mechanism.

PERSONAL ADVICE

Our sales team is happy to advise you any time there are questions about our products and their application. Together you will find the right product for your individual needs.

TRAINING OPPORTUNITIES

We offer a wide range of training options for the proper handling of our products. In-person or virtually, our application experts are available to help.
