NEEDLESTICK
INJURY IS ONE
TOO MANY**

VACUETTE® QUICKSHIELD

Safety Tube Holder

Protection against needlestick injuries
during routine daily blood collection.

greiner
BIO-ONE

A PROTECTIVE SHIELD

keeps the
needle safe
after activation.

FOR DAILY BLOOD COLLECTION ROUTINES

The VACUETTE® QUICKSHIELD Safety Tube Holder offers protection against needlestick injuries with no change to collection technique.

The safety tube holders of the QUICKSHIELD product family include a protective shield that safely keeps the needle in place and covered after activation, protecting against needlestick injuries.

This shield is attached directly to the holder. With the aid of a stable surface or the finger or thumb, users can activate the protective shield with one hand. Easy handling and extensive protection against injury and infection make this product a winner for daily blood collection routines.

PROTECTIVE SHIELD FOR GREATER SAFETY.

- / No change to the collection technique.
- / More flexibility with regard to user- and patient-specific requirements thanks to the rotational safety shield.
- / Complete activation of the safety shield is indicated by an audible and tactile click.

The ergonomic
design of the
holder ensures a
good grip during
venipuncture.

A dot on the needle protection cap indicates the position of the needle bevel to enable precise puncture.

SAFETY AND PRECISION

The viewing window on VACUETTE® VISIO PLUS Needles for indicating a successful venipuncture has a specially designed filter that reduces dead volume by 75% versus comparable products.

The dot on the needle protection cap is aligned with the needle bevel. This serves as an indication of the position of the needle bevel for precise

puncture. The protective shield can be rotated to the preferred position without having to remove the needle protection cap first.

After successful puncture and sample collection, the next step is activation of the safety shield outside the patient's vein.

VISUAL INSPECTION IN COMBINATION WITH VISIO PLUS

A transparent viewing window indicates a successful venipuncture.

The holder's protective shield can be positioned in any direction. This gives you clear visibility of the entire puncture site and greater flexibility to adapt to any situation.

CHOICE OF VARIOUS OPTIONS

The VACUETTE® QUICKSHIELD Safety Tube Holder can be used with either VACUETTE® Multiple Use Drawing Needles or with VACUETTE® VISIO PLUS Needles.

We offer a wide range of regular needles, needles with visual puncture control and

pre-assembled products for an efficient solution for every situation.

As a combination product with a pre-assembled needle, the product comes individually packed in sterile blister packaging.

**VACUETTE® QUICKSHIELD
Safety Tube Holder**

The safety tube holder with rotating safety shield is suitable for routine blood collection under normal vein conditions thanks to its easy handling.

The holder can be used with either VACUETTE® Multiple Use Drawing Needles or with VACUETTE® VISIO PLUS Needles.

**VACUETTE® QUICKSHIELD
Complete PLUS**

VACUETTE® QUICKSHIELD Complete PLUS is available as a combination product with a pre-assembled VACUETTE® VISIO PLUS Needle.

The needle's transparent viewing window enables visual puncture control. The pre-assembled product is ready for immediate use without any further steps.

**EASILY
SAVE TIME**
with the
pre-assembled
VISIO PLUS Needle.

THE COMBINED PRODUCT

**VACUETTE® QUICKSHIELD
HOLDER PRE-ASSEMBLED
WITH THE NEEDLE**

PROTECTIVE SHIELD

GREATEST POSSIBLE FLEXIBILITY

The rotating protective shield ensures a clear view of the entire puncture site and gives the user flexibility to adapt to all situations.

ONE-HANDED ACTIVATION

The protective shield is activated with one hand, either with the aid of a solid surface or with a finger or thumb.

PROTECTION

A audible click indicates that the shield has been activated. Once activated, the needle is safely and irreversibly enclosed, eliminating the risk of a needlestick on the way to disposal.

PLEASE

ACTIVATING THE SAFETY MECHANISM

Option 1

Option 2

1

Activate the safety mechanism **either on a stable surface or with your finger or thumb.**

2

A **click** can be heard as soon as the shield is safely activated.

IMPROVED SAFETY

Once the shield is in place, the needle is securely and irreversibly enclosed.

INCREASED PATIENT COMFORT

In combination with VACUETTE® VISIO PLUS Needles, the viewing window serves as a visual indicator of successful venipuncture.

SAFETY AND PRECISION

A dot on the needle protection cap helps indicate the position of the needle bevel for optimal preparation of the product before the puncture.

NO CHANGE TO THE COLLECTION TECHNIQUE

Thanks to the rotating protective shield and ergonomic design, the product can be used with equal ease by both left-handers and right-handers.
