VeinViewer® Flex
Illuminating Healthcare
VeinViewer® Flex

The flexible solution for improving ‘first attempt’ success rate for patients with difficult venous access.

Using Near Infrared (NIR) technology, VeinViewer® Flex can improve the patients journey, by reducing the number of venepunctures required to access the vein.*

Demonstrated to reduce the time required to insert a venous access device therefore improving working practices.*

Studies have shown that VeinViewer® Flex reduces the number of PICC devices required to be inserted, potentially saving time, money and the associated risks.**

Ordering Details
