

# Cryo.s™ with Linear Barcodes

## The Ultimate Solution

Cryo.s™ with linear barcodes represent an innovative efficient and safe way to sample management.

Greiner Bio-One is pleased to offer robust barcode printing on Cryo.s™ that withstands long-term storage in the gas phase over liquid nitrogen and is resistant to organic solvents like ethanol (to 70 %) and DMSO (50 %). A broad range of common barcodes (e.g. Code 39; Code 128; 2/5 Interleave; Datamatrix) is available. As an option, customised sequence numbers can be printed to your specific requirements. The minimum ordering quantity is as low as 300 or 500 vials, depending on the vial size.

### Key Facts

- Cryo.s™ with barcodes according to customers needs
- Broad range of barcodes available: e.g. Code 39; Code 128; 2/5 Interleave
- Withstands long-term storage over liquid nitrogen and is resistant to organic solvents
