## Availability of our products in connection with the coronavirus

Dear Sir or Madam,

with our production plants in Europe, the supply of the European markets with our products is ensured in every aspect.

Most of the raw materials and components required for the manufacturing processes come from European suppliers. We only purchase a few components and goods directly or indirectly from China. For all these materials, we have sufficient stocks levels or, if necessary, can also obtain them from alternative European suppliers at any time.

From the current perspective, we do not expect any effects or restrictions in the ability to supply our products in connection with the coronavirus.

Kind regards,

i.V. Michael Gutsche  
Export Director
