SUPPLIER NAME: GREINER BIO-ONE PUBLICATION DATE: 01. 07. 2025

COMMITMENT TO ACHIEVING NET ZERO

Greiner Bio-One UK is committed to achieving Net Zero emissions in Scopes 1 and 2 plus the identified subset of Scope 3 by 2050 (Scope 3 subset: Upstream energy, Upstream transportation and distribution, Waste generated in operations, Business travel, Employee commuting, Downstream transportation).

2021 BASELINE EMISSIONS FOOTPRINT*

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were calulated prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Emissions	Total (kg)
Scope 1	50,959
Scope 2	0
Scope 3 Upstream energy Upstream transportation and distribution Waste generated in operations Business travel Employee commuting Downstream transportation	6,080,326
Total Emissions	6,131,285

^{*2021} re-baselined following improved calculation methodology.

2024 EMISSIONS REPORTING

Emissions	Total (kg)
Scope 1	46,263
Scope 2	2,262
Scope 3 Upstream energy Upstream transportation and distribution Waste generated in operations Business travel Employee commuting Downstream transportation	5,639,394
Total Emissions	5,687,919

EMISSIONS REDUCTION TARGETS

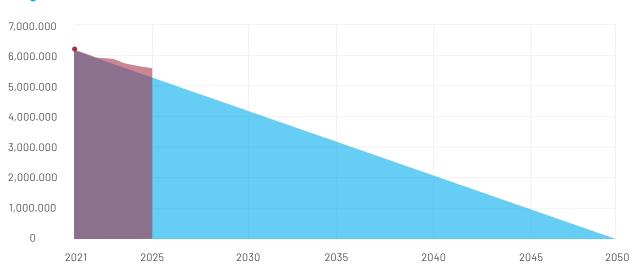

Greiner AG commits to reduce absolute scope 1 and 2 GHG emissions 60% by 2030 from a 2021 base year. Greiner AG also commits to reduce absolute scope 3 GHG emissions from fuel and energy related activities, upstream transportation and distribution, downstream transportation and distribution, and end-of-life treatment of sold products by 25% within the same timeframe. Greiner AG further commits that 80% of its suppliers by emissions covering purchased goods and services, will have science-based targets by 2027.

Greiner Bio-One UK is currently implementing a roadmap that will define key activities to be undertaken to reach Net Zero by 2050. This includes, but is not limited to, the adoption of EV's, improved waste sorting and diverting expired products from standard waste streams.

CARBON REDUCTION PROJECTS

The following projects are currently being undertaken or have already been implemented as part of the

overall objective of achieving Net Zero:

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been

reported inaccordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier

1st July 2025

Noel Ennett Operations Director Greiner Bio-One
